

Subscriber Cohort Analysis

Every customer who started a subscription since July 1, grouped by start week. A renewal counts as kept if it was paid within 7 days of its due date (first order date plus 30 or 45 days per renewal). Subscribers whose renewal is not yet 7 days past due are excluded from that column. Duplicate contracts from merges are collapsed to one customer.

233
subscribers started since Jul 1

62%
paid renewal 1 (80 of 128 due)

45%
paid renewal 2 (5 of 11 due)

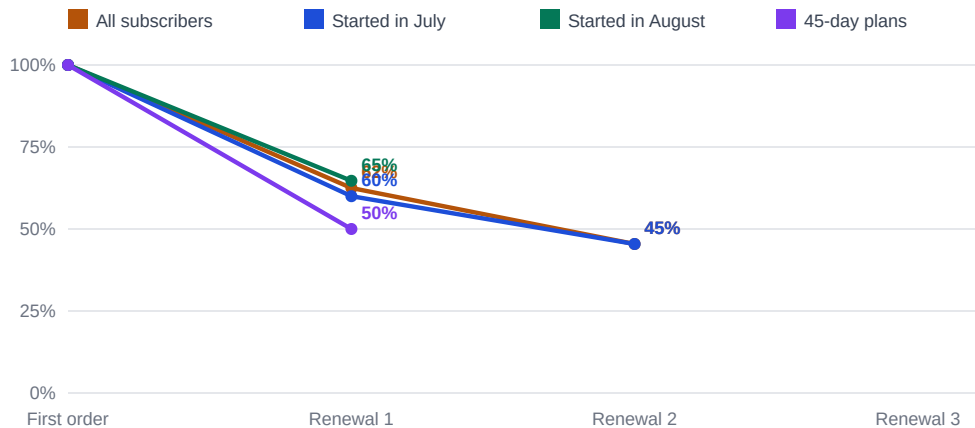

78 of 128
still paying today, of those who have had at least one renewal due (61%)

Cohorts by start week

Start week · offer	Subs	30d / 45d	Scents	Renewal 1	Renewal 2	Renewal 3	Still paying
Jul 13–Jul 19 Free \$120 diffuser + \$39.95/mo (launch)	11	11/0	1.4	64% 7 of 11	45% 5 of 11	not due	5 of 11
Jul 20–Jul 26 Free \$120 diffuser + \$39.95/mo	18	18/0	1.0	39% 7 of 18	not due	not due	7 of 18

Sep 21–Sep 27 Current: \$49.95/scent, free diffusers	9	9/0	1.9	not due	not due	not due	—
All subscribers since Jul 1	233	157/76	1.4	62% 80 of 128	45% 5 of 11	not due	78 of 128

Each renewal cell shows the share who paid, and underneath, how many paid of how many were due. "Still paying" counts subscribers whose most recent due renewal was paid, out of those who have had at least one renewal due. The September cohorts have no renewals due yet.

Retention curve

Each line starts at 100% on the first order. Points are shown only where at least 5 subscribers were due.

Cuts that matter

Group	Subs	Renewal 1	Renewal 2	Still paying	Rate
30-day plans	157	65% 71 of 110	45% 5 of 11	69 of 110	63%
45-day plans	76	50% 9 of 18	not due	9 of 18	50%
1 scent per delivery	161	62% 67 of 108	56% 5 of 9	65 of 108	60%
2 or more scents per delivery	72	65% 13 of 20	0 of 2 too few to rate	13 of 20	65%
Started in July	60	60% 36 of 60	45% 5 of 11	34 of 60	57%
Started in August	133	65% 44 of 68	not due	44 of 68	65%
Started in September	40	not due	not due	0 of 0	—

Read-out

- **About six in ten pay the first renewal on time.** 80 of 128 subscribers who were 7 days past their first due date had paid (62%). The worst cohort is Jul 20 (39%), the best is the Aug 10 build-your-kit week (73%, 27 of 37). Jul 27 sits at 62%.
- **The second renewal is where the base thins out.** Only the launch cohort is far enough along: 5 of 11 paid renewal 2 (45%). The Jul 27 and August cohorts reach that point through October, which is when this table becomes decisive.

- **45-day plans are not retaining better.** 50% paid renewal 1 (9 of 18) against 65% on 30-day plans, and they bill less often, so they produce less cash per subscriber per month on both counts.
- **Multi-scent subscribers renew at least as well as singles** (65% vs 62%) while paying about twice as much per delivery, which is why the 2- and 3-scent tiers are the ones to push.
- **Almost none of the drop-off is cancellations.** Subi shows 5 real cancellations. The rest of the missed renewals are cards that failed and were never recovered, so the curve above is mostly a payment-recovery curve.

How to use this. Treat renewal 1 at about 62% and renewal 2 at roughly 45% as today's baseline when pricing an offer. If Subi recovery lifts renewal 1 to 80%, every cohort row shifts up and the payback math in the offer guide shortens by about a month.

Data as of September 25, 2026 from Shopify orders and Subi customer tags. Renewal due dates are computed from the first order date and the plan cadence; Subi's own billing calendar may differ by a day or two.
